SUCCESSFUL GROWING STARTS AT THE ROOT
WITH LAMBERT® SOILS & AMENDMENTS

LAMBERT® PEAT MOSS

A family company dedicated to horticulture for four generations.

Lambert Peat Moss Company, founded in 1928, is one of the true pioneers in developing the peat moss industry in North America. With the fourth generation of Lambert still operating from the original location in Rivière-Ouelle, Québec, along the south shore of the St-Lawrence River, we have expanded to several bogs along the north shore and near Lac St-Jean. Starting with the original product line of screened and bagged peat moss, we now offer numerous lines of professional growing mixes and retail potting mixes as well as select types of premium peat moss.

Today, Lambert Peat Moss supplies both the amateur horticulturalist and professional growers alike. A nationally based distribution network and strong individual product representation is always bringing new products to the trade. Lambert is able to supply the market at competitive prices to distributors and commercial users throughout Canada, United State and Mexico via ground transportation. In order to offer our clients the most efficient means of transportation, Lambert ships directly from their production plants and from their distribution center in Beloeil, near Montréal, Québec. We also export products via container shipments around the world to South America, the Caribbean, Asia, Middle East and Europe. Based on our strong quality control, technical support and industry knowledge, Lambert gives their customers confidence that our products will serve their needs: service with the ability to supply products on time.

One of the secrets to Lambert's success is our ability to quickly adapt to the customer's request. This devotion to meeting the customer's needs comes from the Lambert family and their staff and has been rewarded with more than 95 years of success and respect from the industry.

Quality First... A priority at Lambert Peat Moss.

Hand in hand the product and the service bring you the very best peat moss, grower mixes, retail peat and potting mixes...

Lambert... At the root of your success since 1928.

OUR PROCESSING PLANTS & LOCATIONS

Our six peat bogs are located on both banks of the St. Lawrence River in Quebec, Canada. They are autonomous in terms of harvesting operations, the coordination of activities being ensured by our head office in Rivière-Ouelle, Quebec. Our total operating capacity spread across the various regions is rarely affected by adverse weather conditions.

Lambert Rivière-Ouelle (head office, laboratory, harvesting site, peat and substrate packaging plants) is located on the South Shore of the St. Lawrence River about 90 miles (167 km) northeast of Québec City. The original location in use since 1928 by Lambert.

Lambert Beloeil (warehouse and distribution center) is a 40 acres storage and distribution center. It is located at 13 miles (20 km) from Montréal City.

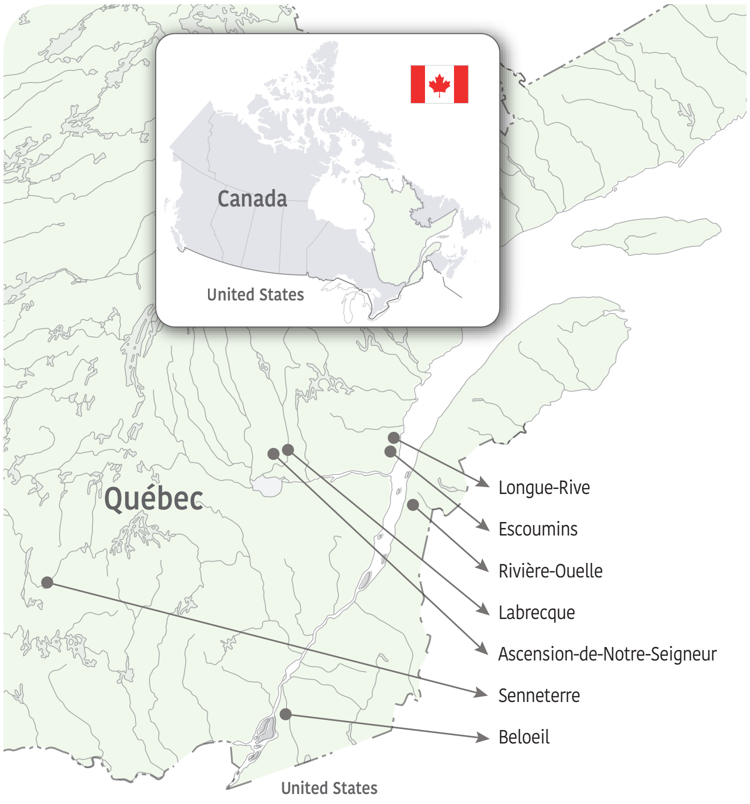
Lambert Longue-Rive (harvesting site and peat packing plant) is located on the North Shore of the St. Lawrence River about 180 miles (334 km) northeast of Québec City.

Lambert Escoumins (harvesting site and peat packing plant) is located on the North Shore of the St. Lawrence River about 160 miles (297 km) northeast of Québec City.

Lambert Ascension-de-Notre-Seigneur (harvesting site and peat packing plant) is located inland on the north shore of the St. Lawrence River approximately 160 miles (297 km) north of Quebec City.

Lambert Labrecque (harvesting site)is located on the north shore of the St. Lawrence River near the Lambert Ascension-de-Notre-Seigneur site.

Lambert Senneterre (harvesting site) is located in Abitibi.



AT THE ROOT OF YOUR SUCCESS SINCE 1928™

QUALITY FIRST... A PRIORITY AT LAMBERT

Lambert Laboratory

Quality has always been a priority at Lambert, that's why the company owns a complete quality control laboratory. The laboratory staff developed standards and procedures to make sure that every cubic foot of product that leaves our yard complies with our standards.

Quality control procedures are also developed regularly to increase the quality of our products. Procedures can be divided into three areas: chemical, physical and packaging. To comply with chemical standards, our products are sampled and analyzed for pH, EC and S.M.E. levels. To assure that physical standards are respected, we analyze particle size distribution, porosity and moisture content. Also, we regularly measure the yield and the firmness of our bags. Finally we run random greenhouse tests in order to evaluate our products' performances. Therefore, a product that does not conform completely to one or the other of our tested parameters stay in our yard.

Research and Development

Innovation and improvement play an important role in Lambert laboratories. In order to be able to offer our valued customers the products they deserve, Lambert is constantly working on its processes to condition, harvest and manufacture its sphagnum peat moss. Agronomists and engineers work together to come up with ideas and innovations that will bring our products one step closer to perfection. Whether it is to improve, create a new product or adapt an existing product, the Lambert staff runs different greenhouse trials to achieve its ultimate goal which is to offer the very best for our customers.

Technical Assistance

Our technical team, made up of experienced agronomists and soil technicians, is always ready to answer all of our customers' questions, whether it concerns peat moss or the use of our various products.

At Lambert, We stand behind our products!

MARKET SEGMENTS

Lambert Peat Moss. is one of the leading horticultural producers of sphagnum peat moss and peat-based mixes in North America.

Many companies trust Lambert as a reliable supplier.

Horticulture: Greenhouse growers, nurseries, garden centers, chain stores, soil manufacturers, landscapers, medicinal cannabis

Agriculture: Vegetable producers, annual & perennial flower producers, mushroom producers, fruit farms, blueberry farms, worm culture, tobacco producers

Forestry: Forestry plants producers

Environment: Spills, filtration, absorption, animal bedding

Soil Manufacturing: Soils for lawns, soils for trees and shrubs, soils for gardens and vegetables, soils for flowers, soils for green roofs

Leisure: Golf courses, sports fields, race tracks

DISTRIBUTION NETWORK

Lambert can supply the market at competitive prices to distributors and commercial users throughout Canada, United States and Mexico.

In order to optimize our transportation system, Lambert is able to ship directly from the production plants, and from our distribution center in Beloeil, near Montreal, Québec.

We also export products worldwide via container shipments to South & Central America, the Caribbean, Asia, Middle East, and Europe.

We export to more than 65 countries.

Thanks to its extensive, efficient and versatile distribution network, Lambert can quickly ship its products around the world.

LAMBERT NATURAL & ORGANIC MIXES

Professional Organic All Purpose Mix

For Flowers, Vegetables, Herbs, Trees & Shrubs

This ready to use, environmentally friendly peat-based substrate promotes healthy and rapid plant growth for all your favorite flowers, vegetables, herbs, trees and shrubs. Lambert Peat Moss values only selected quality ingredients to ensure the best growing results.

Uses: All purpose, bedding plants, flowering plants, hanging baskets, foliage, cuttings, seed germination, interiorscapes, whiskey barrels and window boxes

Product Features: OMRI listed for organic production, ready to use, environmentally friendly, professional grower formula, promotes roots growth and saves water

Components: Canadian sphagnum peat moss professional grade, horticultural coarse perlite, natural organic slow release fertilizer, dolomitic limestone and calcitic limestone

All Purpose Organic Potting Mix

lambert
ALL PURPOSE
ORGANIC
POTTING MIX
Mezcla Orgánica de todo uso para macetas
1.5 cu ft

All Purpose Organic Potting Mix is a general purpose media with numerous applications for indoor and outdoor use such as hanging baskets and containers. **It is a favorite amongst plant lovers.**

Adjusted pH combined with coarse perlite promotes aeration, drainage and assimilation of nutrients that are essential for optimum plant growth. This all purpose media is easy to use as it has been pre-moistened.

Uses: All purpose, bedding plants, flowering plants, hanging baskets, foliage, cuttings, seed germination, interiorscapes, whiskey barrels and window boxes

Product Features: OMRI listed for organic production, ready to use, environmentally friendly, professional grower formula, promotes roots growth and saves water

Components: Canadian sphagnum peat moss, coarse perlite, slow release organic fertilizer, dolomitic limestone and calcitic limestone

Includes a 40 day slow release natural organic fertilizer.

Sphagnum Moss

Lambert Sphagnum Moss is harvested from the surface of peat bogs. It has long strands that are used in the lining of wire frames and hanging baskets. It is used extensively by hobbyists for air-layering plants that are difficult to propagate. Some genera of orchids, especially Phalaenopsis, are grown entirely in sphagnum moss.

Uses: Orchids, Topiaries, wire baskets liner, bonsai

Product Features: Ready to use, very decorative

Components: 100% Canadian sphagnum moss

Horticultural Perlite

Lambert Horticultural Perlite is produced by expanding volcanic rock under extreme heat. It is lightweight with many small air spaces that improve drainage in soils. It is ideal for blending with growing mixes for plants that require higher aeration or drainage than most plants. It is an excellent aggregate for rooting cuttings. It can be packed tightly around plant stems to provide support until a root system is developed.

Uses: Potting mix amendment, hydroponic

Product Features: Lightweight, inert, neutral pH, aerates, low salts, sterile

Components: 100% Horticultural perlite

Canadian Sphagnum Peat Moss*

Lambert Peat Moss is an excellent soil amendment because of its capacity to retain water, aerate the soil and it is completely natural. It is OMRI Listed for organic use. Lambert Peat Moss helps retain moisture, aerates soil and provides organic matter for gardens and flower beds.

Uses: Gardens and flower beds

Product Features:

- OMRI listed for organic production
- Adds body to light and sandy soils
- Aerates heavy and clay soils
- Facilitates cultivation reduces the possibility of erosion
- Reduces the loss of fertilizer by leaching
- Protects the soil from drying out and hardening
- Saves water

VERIFLORA®

VeriFlora® Certified Peatland Products Certification

Lambert Peat Moss Inc. proudly holds the VeriFlora® – Certified Peatland Products certification for responsible peatland management since 2011.

VeriFlora® is a sustainability certification and eco-labeling program recognized as the gold-standard in the floriculture and horticulture industries. This certification program is based on ISO 9 001 and ISO 14 001 standards.

The requirements for this program involve all aspects of peat production, environmental protection and social responsibility as well as product quality. Companies that are VeriFlora® certified must meet specific criteria.

An independent agency, Scientific Certification Systems* thoroughly verifies if the company meets these criteria and the company's compliancy based on the following elements:

- **Responsible peatland management**
- **Protection and conservation of ecosystems**
- **Conservation of resources and energy efficiency**
- **Integrated waste management**
- **Equitable working conditions**
- **Community Benefits**
- **Product Quality**

The Canadian peat moss industry has already undertaken steps collectively to maintain and develop the best management practices in the peatland sector and the peat industry.

This certification program for responsible peatland management is the most important standard and compliancy to this program guarantees a firm commitment to ongoing improvement in the production of substrates for horticultural growth.
